

ANIMAL GENETICS AND DISEASES

08–10 May 2019

Wellcome Genome Campus, UK

This conference will highlight recent advances in animal genetics and genomic technologies. It will bring together specialists working on the interface of genomics, genetic engineering and infectious disease with the aims of improving animal and human health and welfare.

SCIENTIFIC TOPICS

- Genetics of immune response
- New technologies in breeding
- Quantitative genetics applied to disease
- Epidemiology
- Host pathogen interactions: microbiome – mechanisms & modelling
- Comparative and functional genomics
- Pathogen genetics and genomics

COMMITTEE MEMBERS

- [Leif Andersson](#) – Uppsala University, Sweden
- [Mark Fife](#) – The Pirbright Institute, UK
- [Susan Lamont](#) – Iowa State University, USA
- [Helen Sang](#) – The Roslin Institute, UK
