

Single Cell LATAM Symposium: Connecting Communities and Advancing Research 2024

Abstract guidelines

The abstract can include research work, a project or an idea, a proposal for a project and fall under the following themes:

- Single-cell on the disease context, including infections, neurological diseases, oncology, immunity and others;
- Single-cell applied to normal tissue development and homeostasis;
- Policy in single-cell methods including data sharing, data repositories;
- Capacity building - Workforce development, networks and community building;

Abstract instructions

It must be written in English.

Title: The abstract title should be concise

Author names and **Affiliations:** For each author give the forename followed by the surname.

Abstract narrative length: should not exceed 300 words

Abstract narrative: must be clear and concise.

Clearly describe the problem you are addressing, the experiments/analysis you have done, the results to date, and any conclusions you can draw from them.

If your work is still at an idea or project proposal, your abstract should provide a background/context/justification, proposed methods and preliminary results of findings or expected outcomes.

Avoid saying in effect 'a solution to XYZ problem will be presented/discussed'.

The committee will choose short lightning talks based on the abstract. We recommend you have a colleague read over your abstract and check it for 'sense', spelling, and grammar in advance of submission, as abstracts will not be edited.

References: A separate list of references at the end of the abstract is not necessary.

Deadline for submission of abstracts: 05th of July

Feedback: 16th of July

Please note: Only those invited to submit abstracts can be considered. You are welcome to register your interest in the event by the 17th of June. If pre-selected, you will be invited to submit an abstract on the 21st of June.
